The conference series on **Automatic Face and Gesture Recognition** is the premier international forum for research in image- and video-based biometric recognition, and hand gesture and body movement analysis. The program will be single track with posters. The conference series is arranged by the IEEE Computer Society TC PAMI and FG2006 will be hosted by the British Machine Vision Association in conjunction with the University of Southampton UK. **FG 2006** will be held in Southampton which is in central south UK near Heathrow and many top tourist sites. Topics will include:

#### Face Recognition and Analysis

tracking/detection

recognition

reconstruction

expression analysis

3D analysis

#### Technologies

biometric applications

sensors

surveillance applications

feature selection

feature analysis

#### Gesture Recognition and Analysis

gesture interpretation

head motion tracking

arm/ limb analysis

human body tracking

vision based human interfaces

#### Body and Movement Analysis

human motion analysis

body movement analysis

gait recognition
